

The opportunity

Replace 200+ Excel pricing workbooks with one governed AI-native platform. Tax engagements modeled across 4-entity tabs. Calc parity to your workbooks at the cent. AI starts at heuristic in Phase 1 and graduates to real LLMs (Phase 2), vector intelligence (Phase 3), and trained ML on your historical data (Phase 5). Intapp Intake + Screening land in Phase 4 — DealPad remains the pricing engine; Intapp stays the conflicts/intake source-of-truth.

5 phases × 8 weeks = 40 weeks (milestone-gated GO at each handoff)

PHASE 1	PHASE 2	PHASE 3	PHASE 4	PHASE 5
Excel Parity + Tax Foundation Calc parity • Tax scope (1040/1120/1065/1120S) • Multi-entity tabs • Heuristic AI	Pricing Sophistication + Real LLMs All 6 fee models • Batch renewals (Tax-season) • Real LLM AI • Telemetry day-1	Intelligence Engine Vectors • Voice • Watchdogs pgvector k-NN <500ms • Voice→scope • Scope-creep detector • Workday push	Intapp + Client Maturity Intake • Screening • Portal Intapp Intake AI extraction • Screening sync • Magic-link portal • Real-time collab	Production + Trained ML ML-trained models Tax effort estimator <10% MAPE • LP margin solver • Slack/Teams • Multi-region

Tax-first by design

- 1040 / 1120 / 1065 / 1120S / Schedule K seeded P1
- Multi-entity worksheets (one deal, four entities)
- Tax PHB Standard Bundle = assembly engine demo
- Tax-renewal batch = 200+ deals in one

AI from day one

- Heuristic Phase 1 → real LLMs Phase 2
- pgvector similarity Phase 3 (sub-500ms)
- Trained ML on your Tax history Phase 5
- AI cost telemetry from first LLM call

Q2C-integrated

- D365: bi-directional from Phase 1
- Workday: cost-center + project push Phase 3
- Intapp: Intake + Screening Phase 4
- Conga: engagement-letter delivery Phase 3

What we need from Armanino

- 10 representative Excel workbooks for calc parity
- Tax scope-catalog source data + PHB definition
- D365 sandbox access for opportunity-context auto-load
- PDL + PO part-time embed for parity acceptance
- Phase 2: Anthropic / OpenAI / Azure key access
- Phase 4: Intapp Intake + Screening API access
- Phase 5: Historical engagement data for ML training

What you get

- Wk 4 — Shared dev URL with Tax catalog seeded
- Wk 8 — Calc parity sign-off; Phase 1 demo
- Wk 16 — Real LLMs powering risk + margin AI
- Wk 24 — Vector similarity + voice-to-scope live
- Wk 32 — Intapp Intake/Screening + client portal
- Wk 40 — Trained ML + Slack/Teams + production
- Always — open code, audit trail, no vendor lock-in

Ask: 8-week Phase 1 GO. Calc parity proven. Tax foundation seeded. AI-native demo by Week 9.
