

RFQ Response to Armanino for Scoping & Pricing 2.0

Enterprise-scaled, Digital, Scoping & Pricing Platform

April 2026

Smarter. Bolder. Faster.

Executive Summary - Transformation Partner for Armanino

Objective: Armanino’s objective is to transform Excel-based pricing into a **controlled, scalable platform** that **preserves calculation fidelity, strengthens governance**, and supports faster, **consistent execution** across the firm

Scope Summary

- Digitize existing Excel-based pricing and scoping models.
- Maintain consistency and accuracy of existing pricing calculation logic across all Business Units.
- Provide a unified workflow that seamlessly supports both new project pricing and renewal scenarios.
- Facilitate streamlined and reliable integration with downstream Quote-to-Cash systems.

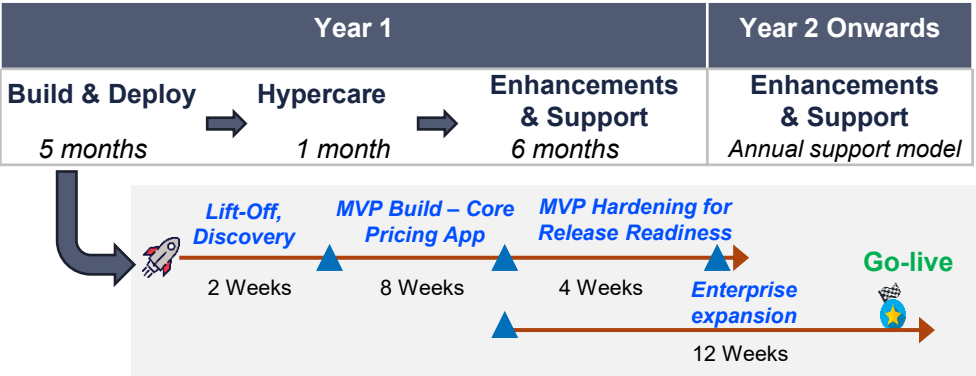

Build vs Buy Decision

- Armanino requires highly specialized pricing and scoping engine with Excel-level calculation fidelity.
- We recommend – A custom-built solution with cleaner architecture, Protects pricing fidelity, Fully scalable and AI-ready.
- CPQ products will require significant customization to serve Armanino’s specific business need and complexity.

Proposed Solution

- Unified pricing platform with Domain led design.
- Enterprise Grade secured API integrations with multiple systems
- Cloud enabled and scalable solution with highly configurable, workflow orchestrated solution
- Agentic AI enabled and contextual insights for the users

Timeline

Value Adds

- Pricing Advisor
- Margin Comparison
- Recommendation on Effort Estimation
- Pre-built Templates

Business Benefits

- Faster deal cycles
- Improved margin visibility & control
- Derisk human errors
- Audit-ready pricing decisions

Key Highlights for our approach

Configured Rules & workflow-driven Solution

Secure API-led Integrations

Intelligent Insights with Agentic AI enabled

Contextual User Experience

Scalable & Cloud managed Architecture

Current State Understanding

Smarter. Bolder. Faster.

Current State Understanding & Challenges

Transitioning pricing process from a functional to a scalable, automated process

New Projects

Input Data Points Needed:

- Project Context
- Rate Tables
- Catalog
- Rules & Guidelines around:
 - Costs
 - Margins
 - Pricing Rules
 - Factoring in

Renewal Projects

Input Data Points Needed:

- Live Data ingestion
- History of prior contract and pricing decisions

Current State Realities

Rate Sheets:

- ERP data (Workday) is granular at employee level and cost driven (not based on historical burn rate evidence, roles, etc.)

Calculations:

Manually derived and entered in rate sheets & Excel Templates

Historical View

- Needs manual review of past files

Pricing Calculations:

- Excel driven

Challenges:

- Auditability
- Maintainability
- Traceability
- Searchability
- Historical reference

Workflow:

- **Manual**
- **Document Handoffs**

Challenges:

- Time Consuming
- SME dependent and subjective
- Lack of centralized versioning, tracking

Pricing & Scoping Workflow

Client Intake

- Create/manage opportunity
- Define deal structure
- Trigger pricing

Generate Scope & Pricing Draft

- Create pricing record
- Classify project
- Load context
- Load baseline
- Define entities/services
- Select scope items
- Expand assemblies
- Answer prompts
- Generate grid
- Adjust pricing
- Apply pricing logic

Scenario Modelling

- Run scenarios
- Compare options
- Benchmark pricing
- Finalize pricing

Approval Workflow

- Submit for approval
- Route approvals
- Review pricing
- Analyze risk/margin
- Approve/Reject
- Lock version

Resource Management, Eng Letter/ Contract

- Staffing planning
- Pricing Summary Output
- Generate quote
- Generate proposal
- Confirm order
- Export output

Closeout, Roll Forward

- Push pricing to CRM
- Push to ERP

Governance & Audit

[Product Breakdown Hierarchy](#)

Solution options: Comparison with market-leading Products

Parameter	COTS (Salesforce, Oracle, Dynamics CRM, Conga CPQ)	Recommended Custom Build
		
Time to Deploy	Faster for standard use cases	Moderate , but aligned to the Armanino use case.
Deal Pricing Complexity	Basic pricing & discounting (OOTB)	Multi-dimensional pricing
Customizations	40-60% customization required, eroding buy advantage	Built to Armanino Requirement
Professional Services Flexibility	Medium- driven by support network	High — full control
Workflow & Governance	Basic approvals (OOTB)	Advanced workflows, approvals & governance
Maintenance	Vendor-managed	Complete internal ownership
Rule Changes	Often constrained by product limits and vendor release cadence	Frequent changes possible because logic can be tailored precisely
Integration	Strong CRM OOTB	Build required, but flexible
Scalability	Highly scalable	Architect for high scalability and extensibility
Performance	Slow for complex models	Optimized for scale
AI-readiness (Future Ready)	Dependent on vendor roadmap & release cycles	AI-ready by default

Best fit For Armanino

- Armanino requires **highly specialized pricing and scoping engine** that supports recursive assemblies, prompt-driven modeling, Excel-level calculation fidelity.
- CPQ products are **not built** for this level of pricing complexity requiring **heavy customization**.
- We recommend – **A purpose-built solution** with –
 - Cleaner architecture
 - Protects pricing fidelity
 - Fully scalable
 - aligned with Armanino's Quote-to-Cash architecture.

All User Stories will be custom-built

Key Tenets & Target State of our Solution

Persona-driven User Experience

Domain driven design - User experience enriched with context driven and layered architecture

Configurable Rules & Workflow-driven Solution

Pricing rules, and workflows orchestration without heavy customization

Secured and API-led Integrations

Cloud enabled – API led secured (OAuth 2.0 enabled) integration solution with Dynamic 365 CRM and Workday integrations ready

Governance & Auditability

Pricing decisions version-controlled & attributed. Audit-trail enabled. Governance rules can evolve configurable for quick adoption

Scalable and Cloud managed Architecture

Aligning to Armanino Azure CSP and PAAS services – Architecture is designed for Secure, Scalable and Cloud managed services

Intelligent Insights with Agentic AI enabled

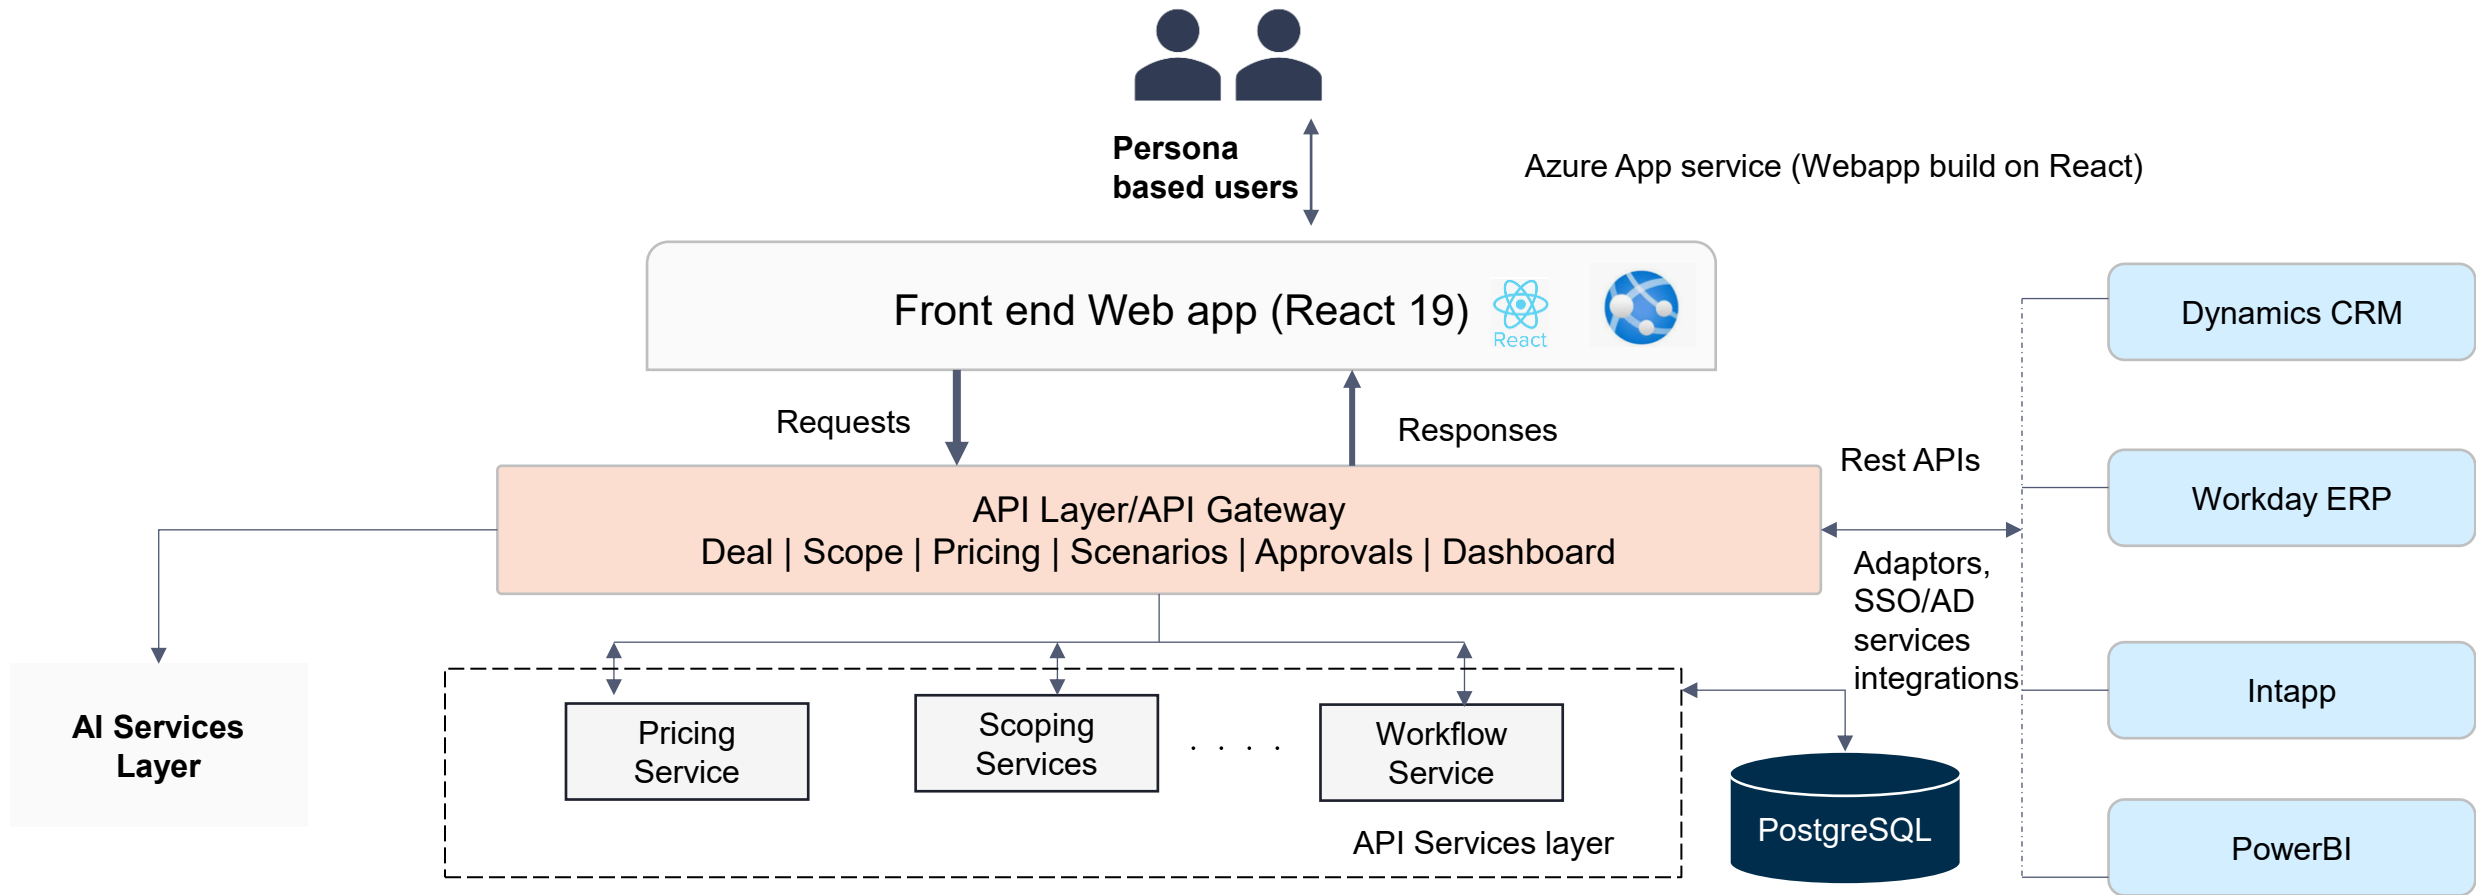

An intelligent, agentic AI-enabled that autonomously orchestrates and synchronizes data from Microsoft Dynamics 365 and Workday for sharing Insights to user such as Pricing Advisor, Margin comparison, Effort estimation recommendations

Target State Vision

- **Unified Pricing Platform**
- **Integrated Q2C Data Backbone**
- **Excel-Preserved logic**
- **Fully Extensible platform**

We are moving from **isolated pricing files** to a **connected pricing ecosystem** — where *pricing becomes a system, not a file*

Technical Solution Overview

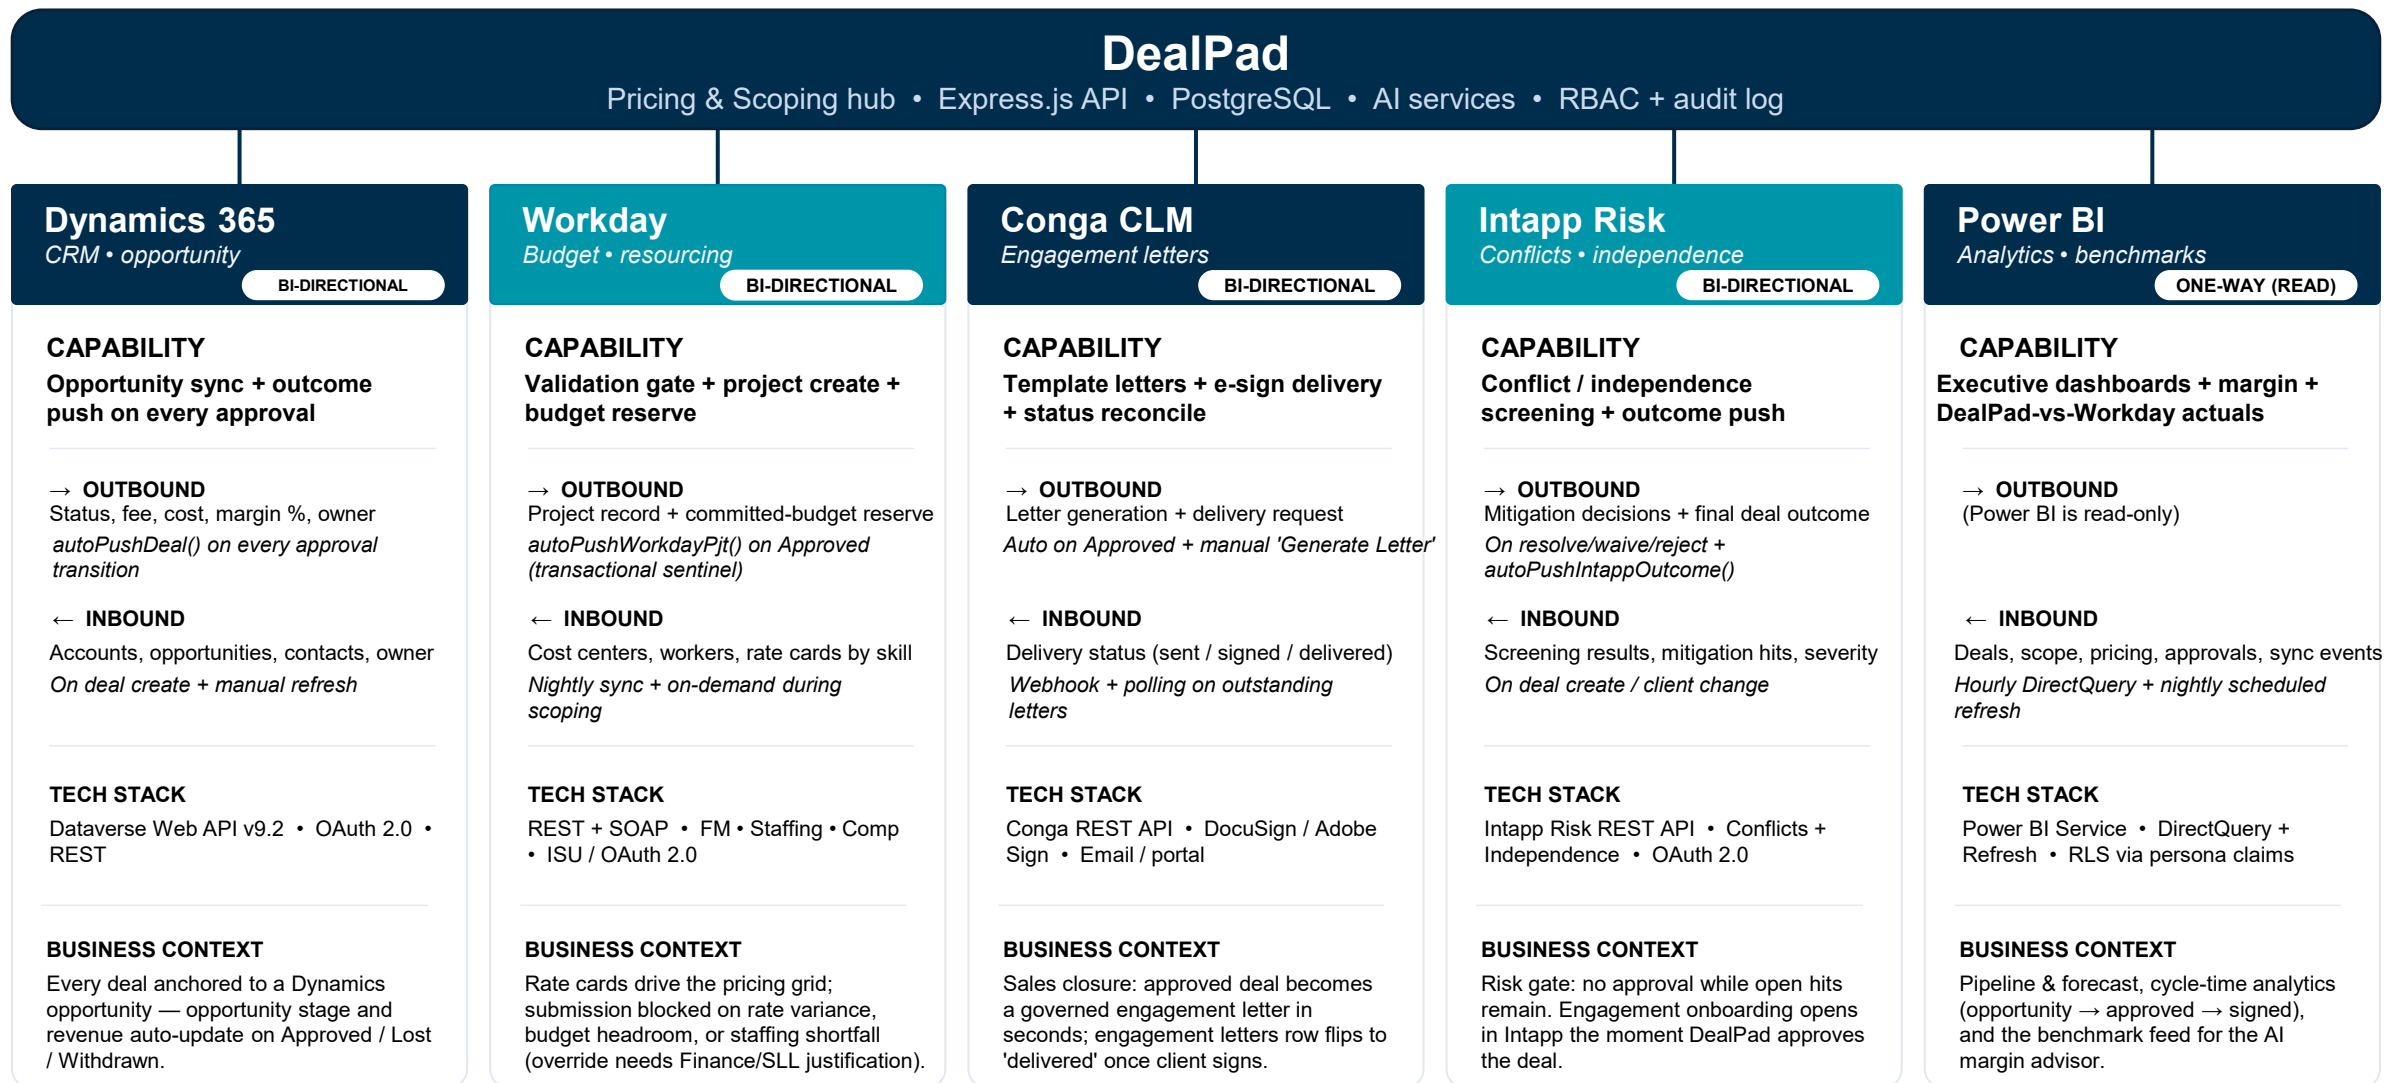

Azure Cloud - AKS, Entra ID (SSO), Container, Azure App service, Event hub, Azure Functions, RBAC, Semantic Kernel, Lang graph, Key Vault

Not just built for today's pricing workflows — architected to absorb AI, new service lines, and new integrations without rebuilding from scratch.

DealPad Integrations Architecture

How DealPad connects to the Quote-to-Cash stack, bi-directional with every system except Power BI (read-only).

All integrations are charted out as per understanding from documents provided in RFQ, further detailing will be performed during execution

Key Differentiators - Elevating User Experience by leveraging Agentic AI

Contextual User Experience

Domain-led, **contextual design** specific to Armanino's business structure and personas

Configurable and contextual **Armanino-specific pricing & approval workflows**

Prebuilt templates aligned to current Armanino use cases for **faster deal initiation**

Accelerated Delivery & Iterative Releases

AI-accelerated engineering across the **SDLC** — Design, Development, Integrate & Test

Faster, iterative releases with **continuous improvement** embedded in every sprint cycle

SaaS theme with **native capabilities** of **Azure cloud**

Agentic AI Enabled

Agentic AI **Chat Interface** — **conversational knowledge repository** for all platform users

AI-assisted contextual insights for estimation and pricing recommendations in real time

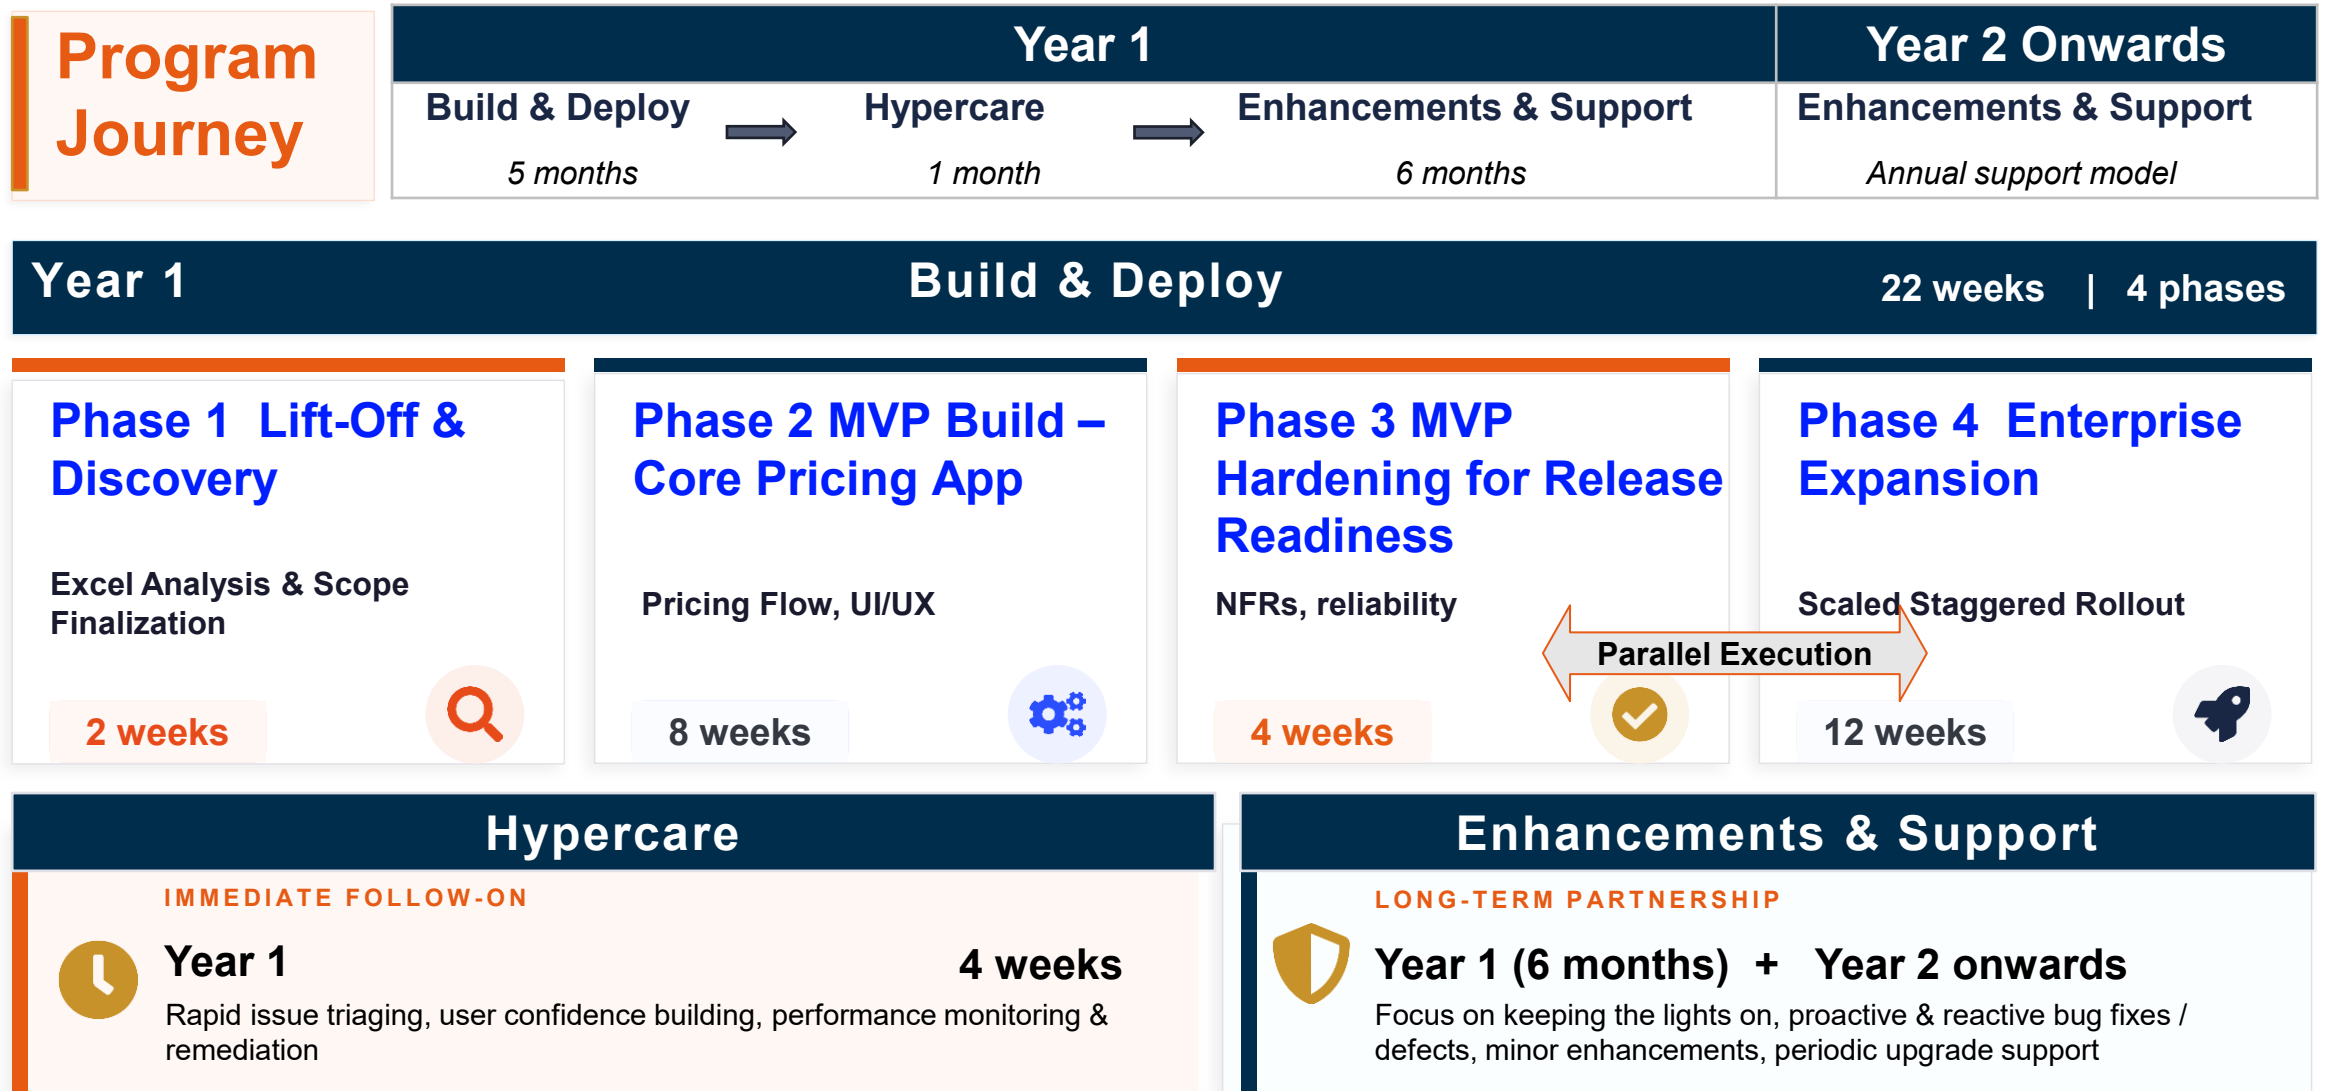

Foundation for fully scaled **AI empowered** platform

Engagement Approach, Timelines

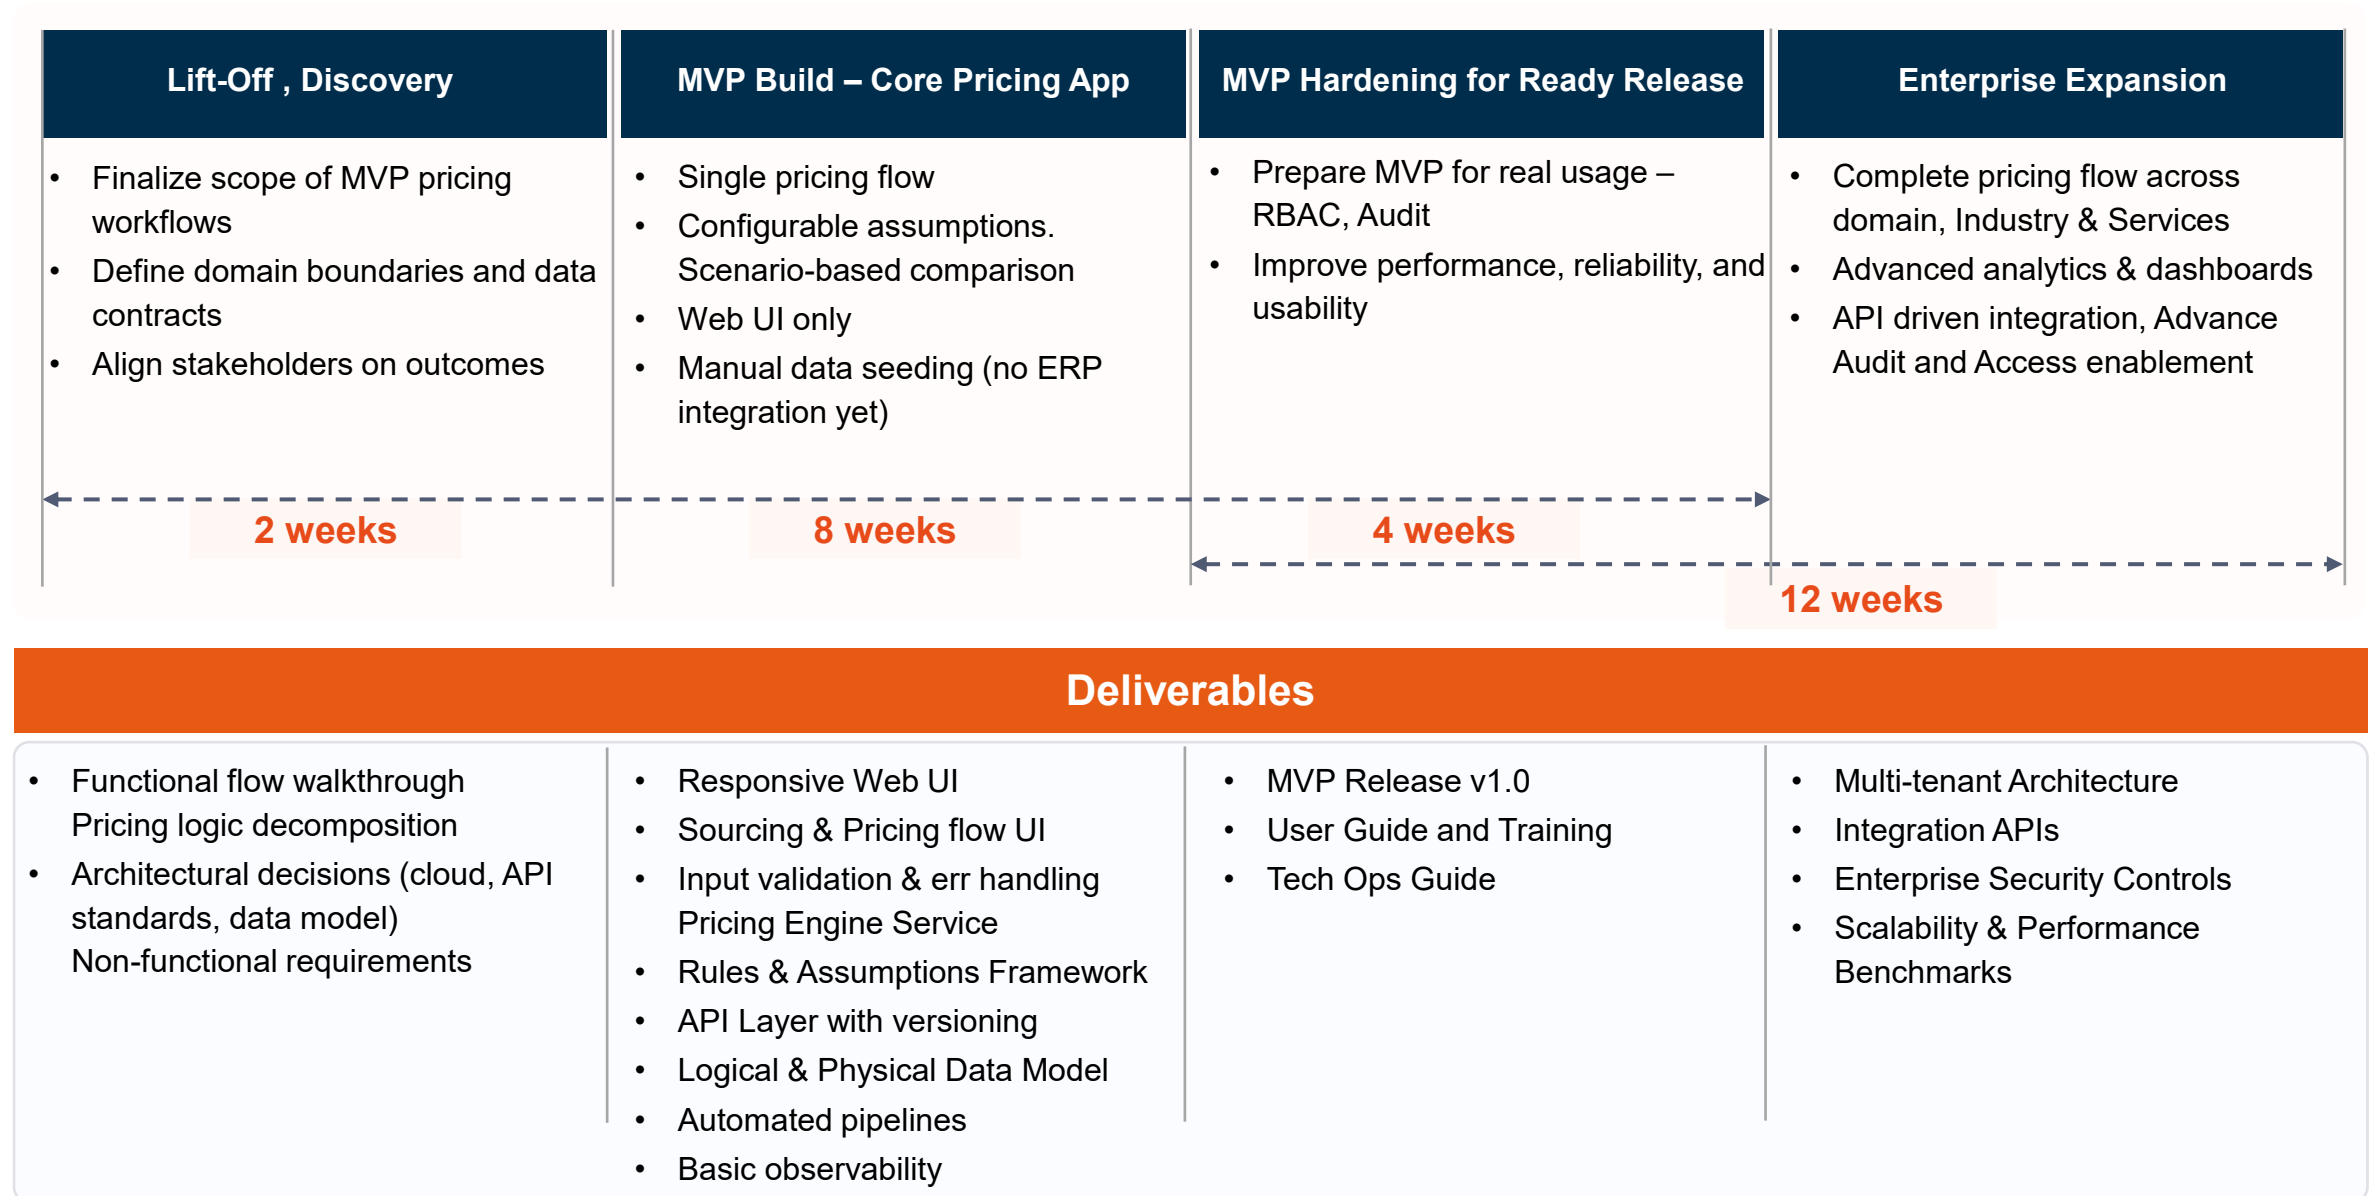

Smarter. Bolder. Faster.

Engagement Approach: Journey map

A journey that doesn't just replace a spreadsheet — it reimagines how Armanino prices, approves, and scales its business

Engagement Approach: Build & Deploy

Engagement Approach: Enhancements & Support

Scope & Coverage

Our our solution will enable **Armanino internal teams** to **support configurability** of **workflows** and **rule engine**.

Platform technology support with focus on **minor enhancements, bug fixes, upgrades** and **integration support**

- **Fixed Capacity** of **320 Hours per** month with No roll over
- **Minor enhancement** will be **capped** at maximum **40 hours** per request in size

Revisit Capacity Requirements every Quarter and **recalibrate**, if required

Support Scope:

- Pricing & Scoping Solution
- Workflow Support

Support Coverage:

- 8 x 5 support during business hours (EST)

Out of Scope:

- L1 Support
- Infra upgrades, Database upgrades

Support Activities

User Management

Bug Fixes

Data fixes

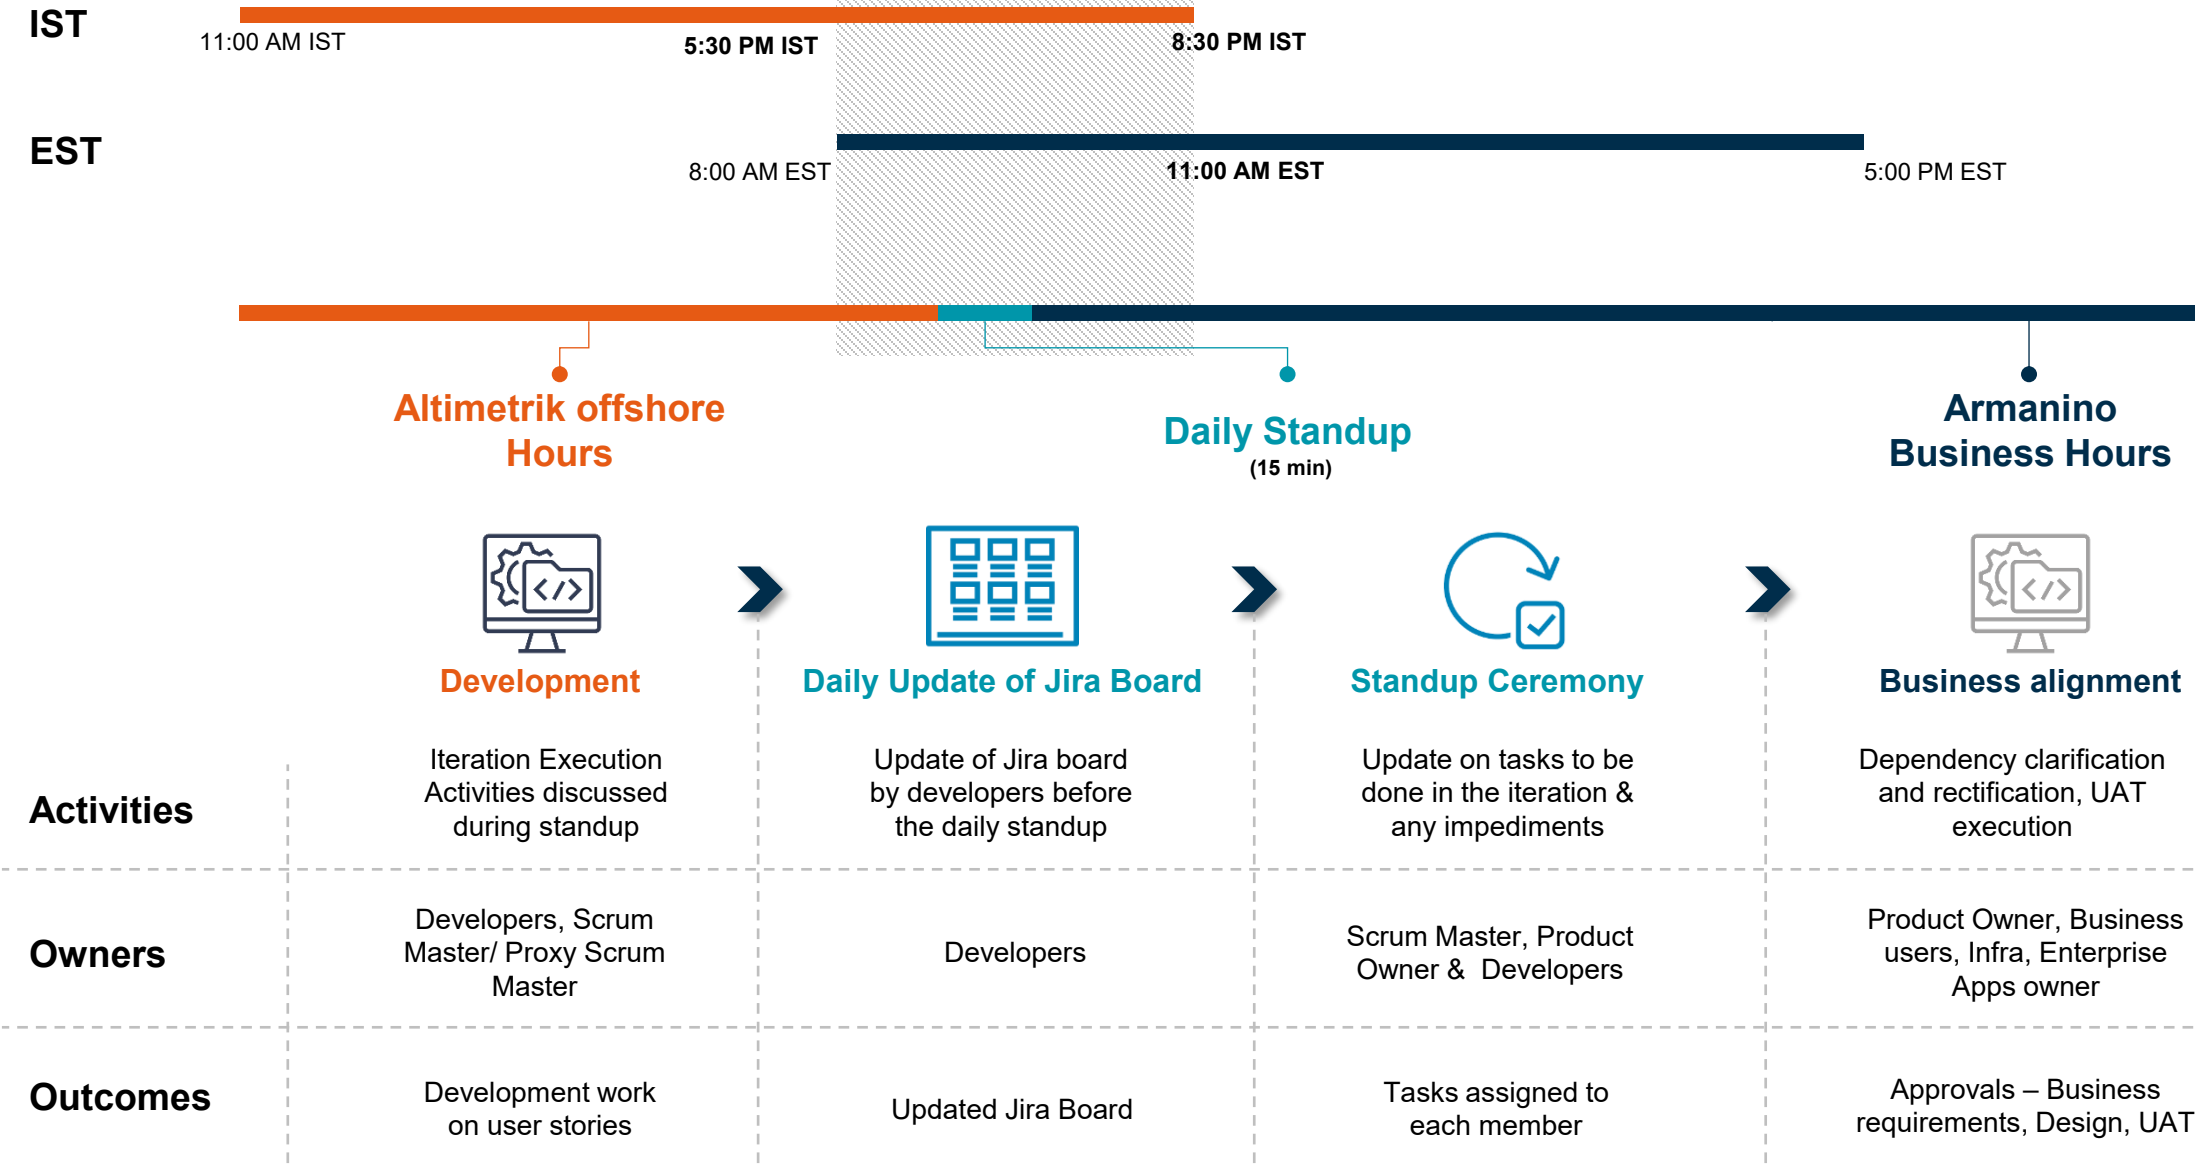

Minor Enhancements

Configuration or Integration Issues

Continuous improvement

Root Cause Analysis

Engagement Approach: Agile Delivery Model

Engagement Approach: Roll out & Go-Live strategy

Rollout is NOT a project milestone — it's a trust-building journey, designed so Armanino's teams succeed before they're asked to scale

Wave 0

Internal Readiness (Pre-Launch)

- Core build team uses the platform

Wave 1

Controlled Pilot (Safe bet)

- Early adopters
- Single BU Rollout
- New projects only

Wave 2

Controlled Expansion

- One Geography / One State
- Single Service Line
- BU's with fewer deal volumes
- Renewal deals only

Wave 3

Broad Rollout (Additional)

- Additional Geographies / States
- Additional Service Lines
- BU's with increasing deal volumes

Wave 4

Full, Enterprise-wide Rollout

- All BU's, All Service Lines
- All Users
- Busy Tax Season

- Roll out plan over 10 weeks in Waves
- 40-50% of the users covered by Wave 3
- Leverage Train the Trainer model. Training modules recorded
- Parallel run of the Excel sheet to compare outputs

Cross-Wave Guardrails Applied Throughout

Busy Season Avoidance

Training required with access

Rollback plan per wave

KPI gating before going to next wave

Solution & Program Assumptions

- User base to be factored as **25% of 2500 FTEs** (Armanino's employee base)
- Solution is designed and stress-tested for **2X** of the current user base
- **Solution roll out** to be done in a **staggered approach** – at enterprise scale aligning with all personas business impact (geo or by state or industry segment)
- All existing rules within the current scope will be migrated without any modifications.
- **No external third-party system** integration for rules assimilation / updates
- All **new requirements / enterprise project impact** to be factored as a **change request**.
- Armanino to **ensure** all environments including **development, testing, production** are **ready and available** for Altimetrik's use for this project.
- Altimetrik will provide support for **routine annual maintenance activities**, upgrades, compliance activities
- During enhancements & support phase, all work items including code changes, will be **capped in size & monthly capacity**. Any large size request should follow the change management process.
- Any significant functional or integration changes to **Upstream and Downstream** to be assessed for impact on this platform and follow change management process.

Solution & Program Pre-requisites and Dependencies

API Access & Integration Readiness

- Armanino will enable API access for **Workday, CRM, Conga, and INTAPP**.
- Armanino will internally coordinate and ensure all required APIs are properly configured, secured, and ready for Altimetrik to consume prior to integration activities.

Architectural Decisions & Approvals

- The engagement is dependent on **timely architectural decisions**, design validations, and approvals from Armanino stakeholders. Delays in decision-making or approvals may impact delivery timelines and downstream dependencies.

Subject Matter Expert (SME) Access

- Provide access to key stakeholders and SMEs from **Pricing, Finance, Operations, and IT**.
- SMEs will be available for workshops, requirement clarification, solution design, walkthroughs, and validation activities as required throughout the engagement.

System & Platform Access

- Grant Altimetrik team members access to required **systems, platforms, and relevant non-production environments** before the engagement start date.
- Access will align with **privilege and security policies** as defined by Armanino.

Governance & Escalation Framework

- Establish a **Governance and Escalation Matrix** with clearly identified:
 - Business owners
 - IT owners
 - Decision authorities
 - Escalation contacts
- Define roles for Program Sponsor, decision-making, issue resolution, and change approval to ensure efficient project execution.

Why Altimetrik

Transformation Partner for Armanino

1

Preserve Excel-based pricing logic & methodology

We ensure **full fidelity** to existing **Excel models**, maintaining consistency across processes

2

Transform execution led by **product-mindset**, delivering **bite-sized, result-oriented incremental value**

Our solution **digitizes and streamlines** scoping and pricing workflows, and build a **scalable, AI-enabled** platform. **Experts** with extensive experience in CPQ & taxation.

3

Augment solution with **AI-driven insights and analytics**

We lay the **foundation** for scenario **modeling**, **AI-driven insights** and **data-driven** decision-making.

Our leaders are **practitioners first**; they lead from the front

Experienced. Accountable. Thoughtful.

We are **scaled for impact** but **right-sized to care**

Global capability. Entrepreneurial agility.

We help you **preserve your business expertise** while **unlocking** its **full potential** through a **scalable, integrated platform**.

Commercials

Work Package Breakdown	Proposed Price
Development and Support (Year 1)	
Design, Development & Go-Live (5 Months)	\$445,000
Hypercare (1 Month)	
Enhancement and Support (6 Months)	\$93,500
Total (Year 1)	\$538,500
Keeping the lights on (Year 2 onwards)	
Enhancement and Support* (Yearly pricing)	\$187,000

Key Notes:

- All prices are quoted in USD and are exclusive of applicable taxes
- Armanino will procure required licenses of tools or platforms, license product costs are not included in this pricing
- Costs for customer-mandated training if any and travel expenses, will be billed separately and are not included in the quoted price
- The quoted price is applicable to the awarding of the entire scope of work (Build and Support); partial allocation may necessitate renegotiation

* Enhancement and Support model – Estimated based on assumptions, we will jointly discuss with Armanino to finalize the model and pricing.

Experience & Case Studies

Intuit Relationship: From Vendor to Strategic Partner: A Decade of Compounding Trust

Intuit is a leading **financial software** company helping businesses **manage accounting, tax, payroll, and payments** through **AI-driven platforms**.

11+ Years Of Trusted Relationship	400+ Talents Dedicated to deliver value	50+ Platform & Applications engaged	Presence in 4 BUs + 5 Horizontal Function GBSG, VEP, CG, GTM Tech, Data Science, Data Engg/Data Sc. & AI & Fintech
---	---	---	--

2015–2017 Entry and Foundation Entered the account through transactional application support	2018–2020 Data and Platform Expansion Expanded into data engineering, data lake, analytics, and migration-led work,	2021–2023 Program-led Scale-Up Scaled into larger programs across billing, and broader platform/data initiatives,	2024–2025 Strategic Partner Positioning Strengthened position through incumbent displacement, outcome-based execution	2026 onward AI- and Platform-led Growth Now positioned as a strategic engineering partner aligned to Intuit's next wave of priorities: AI operationalization, expert platforms

Our Intuit experience is relevant for Armanino's Pricing Modernization

Altimetrik has already helped Intuit evolve from transactional support to strategic, AI-led engineering across monetization, tax, and SMB financial platforms—the same capabilities Armanino needs to modernize pricing, improve governance, and scale efficiently.

Intuit Experience

Billing & Payments

Monetize the platform, build sales catalog, integrate with Salesforce, Quick Books, integrations with Apple Pay / Google Pay

Data

EDW to AWS migration, Informatica to Data Lake, Finance & HR datamarts

APIs & AI

Build reusable services, Core AI platform, agentic AI experiences, AI platform engineering

Armanino Relevance

Billing & Payments

Pricing & billing, Sales catalog, approval workflows, pricing controls and downstream apps integration

Data

Single source of truth for pricing decisions, approval records, and firmwide reporting

APIs & AI

API-first approach, Smarter pricing support, and data-driven deal decisioning

Why this matters to Armanino?

Altimetrik provides product engineering, APIs and AI services while modernizing the revenue-critical workflows — exactly what Armanino needs for pricing

Case Studies relevant for Armanino's Scope

Client	Initiative	Relevance to Armanino	Business Impact	
Mclarens 	AI Led Q2C transformation	Transformed Quote-2-Cash (Q2C) process including scope and pricing and integrated to CRM, ERP tools	- Improved operational efficiency across Q2C lifecycle - Enhanced visibility and reporting with centralized data	
Emerson 	Digital CPQ Ecosystem Modernization	Altimetrik partnered with the client to accelerate the CPQ process by integrating the ecosystem to enterprise systems	90% reduction in lead time	75% faster quote cycle
Emerson 	QuoteAI: Sales Quote Assistant	Leveraged AI to create an end-to-end sales quotation with rules engine. Pricing calculations & logic was built within the engine.	Quotation cycle reduced to 3 days from 2-3 weeks	\$40M+ annual gains through increased order projected
FHN 	Capital Assets Landscape Modernization	Altimetrik assessed the entire IT landscape to reimagine business processes and modernized manual BP, enhancing Target state Platform	95% Manual intervention eliminated	25+ Apps / Tools were decommissioned
CNA 	Submission Intake & Endorsement Automation	AI driven Automation of complex submissions processes that are document intensive and manual	4x increase in submissions handled	50% improvements - Submission straight through processing

AI Led Quote-to-Cash (Q2C) transformation

1 The client had fragmented and manual Quote-to-Cash (Q2C) processes across 11 acquired entities

2 Difficulty in integrating multiple technology stacks across entities and Limited scalability to support growth and acquisitions

TARGETED OUTCOMES

Rationalize and standardize Q2C, Pricing and Scoping processes across all entities

Establish a unified, scalable technology platform

Improve reporting, visibility, and data-driven decision-making

SOLUTION ELEMENTS

AI-led Q2C Transformation Framework
Comprehensive assessment of current state processes and systems

INTEGRATIONS
Seamless integration with CRM, ERP, CPQ, and financial systems

SCALABILITY
Handles complex workflows across sales, operations, billing, and finance

ALTIMETRIK CAPABILITIES

AI / INTELLIGENT AUTOMATION

PRODUCT ENGINEERING

QUALITY ENGINEERING

DATA & INTEGRATION
ARCHITECTURE

DELIVERED RESULTS

Significant reduction in manual processes through Automation

Improved operational efficiency across Q2C lifecycle

Enhanced visibility and reporting with centralized data

Digital CPQ Ecosystem Modernization

1 The CPQ process was largely manual, leading to long quote cycles, limited visibility, and frequent errors.

2 Resulting in reduced efficiency, slowed customer response times, and increased reliance on technical teams

TARGETED OUTCOMES

Accelerate sales velocity through integrated CPQ platform

Improve quote accuracy and reduce errors

Enable faster response times and better customer experience

SOLUTION ELEMENTS

DIGITAL CPQ PLATFORM

Built an integrated CPQ ecosystem connected to enterprise systems

INTELLIGENT AUTOMATION & CONFIGURATION

Implemented rule-based product advisor and pricing engine

SCALABILITY & INTEGRATION

Seamless integration with enterprise systems

ALTIMETRIK CAPABILITIES

WORKFLOW AUTOMATION

PRODUCT ENGINEERING

ENTERPRISE SYSTEM INTEGRATION

DELIVERED RESULTS

90% reduction in lead time

75% faster quote cycle

40% increase in quote handling efficiency

QuoteAI: AI-Powered Sales Quote Assistant

1 Response Time: Delayed responses risk losing opportunities to competitors.

2 Pricing Accuracy: Incorrect pricing jeopardizes both winning opportunities and maintaining profit margins.

TARGETED OUTCOMES

Increase the Volume of Q2C submission

Precise Quote generation based on requirement description extracted with 30+data points

Seamless processing of 4,200 RFQs per Month, emails, formal requirement documents

SOLUTION ELEMENTS

AI-powered Quote Assistant

End-to-end sales quotation with approved pricing

Rules Engine

Created Rules Engine for all the pricing parameters

AI-assisted engine

Pricing calculation & logic was built using an AI-assisted engine

ALTIMETRIK CAPABILITIES

GEN AI

PRODUCT ENGINEERING

QUALITY ENGINEERING

DELIVERED RESULTS

20% Higher rate of submissions

\$40M+ Annual financial gains through increased order projected

<3days Response time from 2-3 weeks

Capital Assets Landscape Modernization

1 The client had Legacy applications, evolved over a period of last 25+ years. 30+ Point solutions - includes AS400, VB Apps, Excel macros etc.

2 Longer Trade cycle – taking couple of months for processing

TARGETED OUTCOMES

Assessment of entire IT landscape, Conceptualization & Solutioning

State-of-the-art Loan & Portfolio Analysis solution

Application Development & Testing

SOLUTION ELEMENTS

DISCOVERY PROCESS

Study of existing systems and develop detailed execution plan

SOLUTION PROTOTYPING

Tools/Tech Evaluation, Solution Architecture definition

TARGET STATE ARCHITECTURE

Integrated Frontend layer, Business layer and Database

ALTIMETRIK CAPABILITIES

PRODUCT ENGINEERING

QUALITY ENGINEERING

DATA ARCHITECTURE

DELIVERED RESULTS

25+ Apps / Tools were decommissioned

95% Manual intervention eliminated

1 Week
Trade cycle reduced to 1 week from couple of months

Submission Intake & Endorsement Automation

1 Clients were having complex submissions processes that are document intensive and manual processes leading high handling times and poor customer services

2 Additionally, they had a tedious process for New Client set up and unable to handle surge in volumes

TARGETED OUTCOMES

Adopt a product centric development approach that enable continuous testing and seamless releases

Significantly improve code coverage while reducing the regression cycle times

Stable QA environments that hosts 190+ applications with 90 mission critical applications

SOLUTION ELEMENTS

DEXTR PLATFORM

Intelligent Data Extraction using DExTr Platform that is LLM Agnostic

INTEGRATIONS

Seamless Integration to Policy Admin & Rating systems, and external systems enhancing Pricing engine

SCALABILITY

Scalable over multiple Lines of Business and ability to process data from Unstructured / Structured documents

ALTIMETRIK CAPABILITIES

GEN AI

PRODUCT ENGINEERING

QUALITY ENGINEERING

DEVSECOPS

DELIVERED RESULTS

4x increase in submissions handled

50% improvements - Submission straight through processing

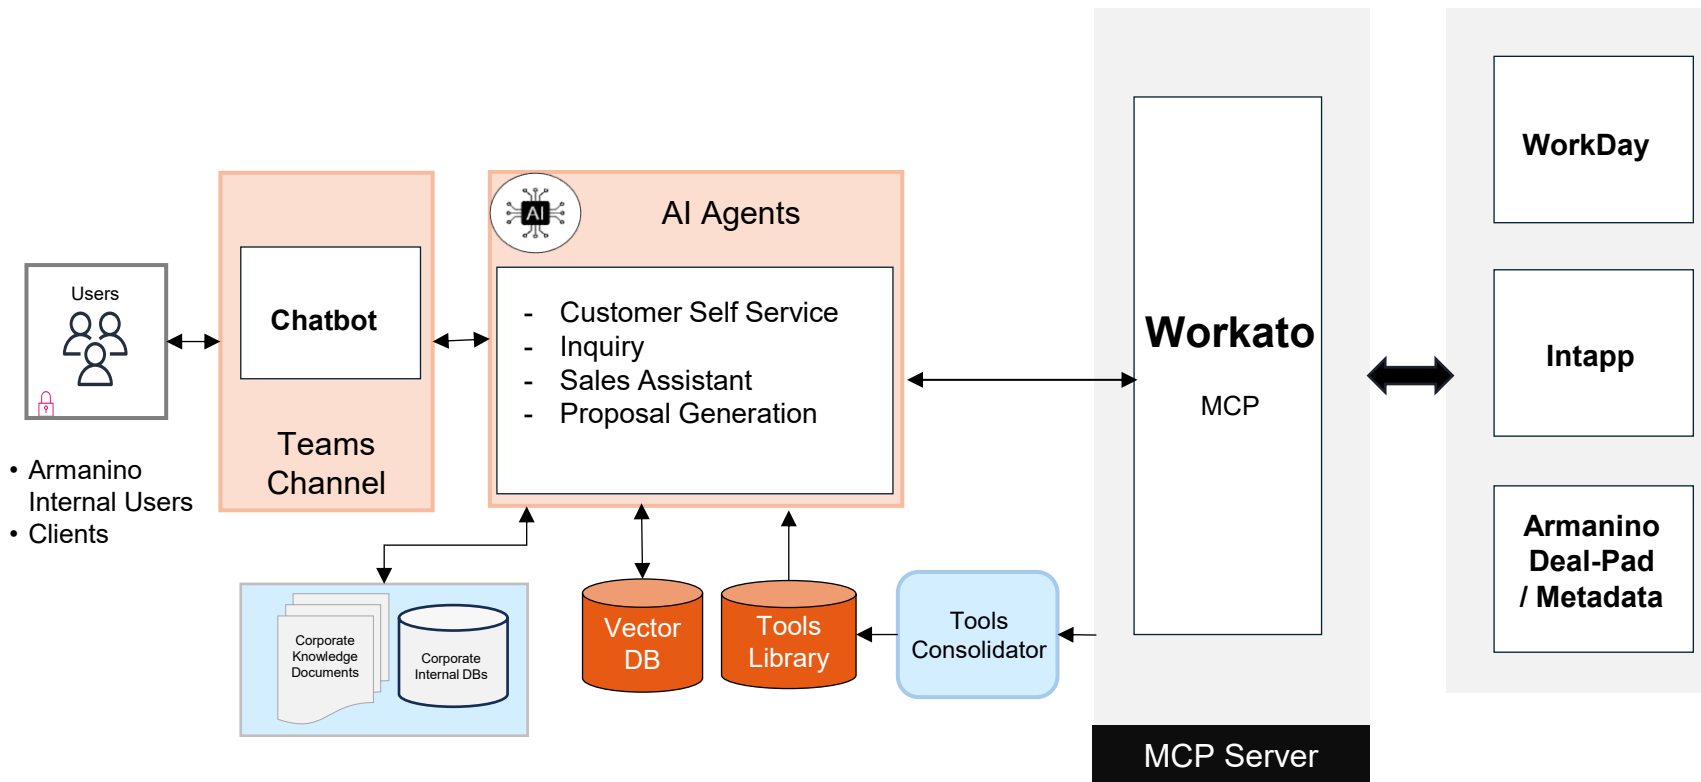

90% Zero touch at field level

Future State Recommendations

AI Led User Interface – logical architecture

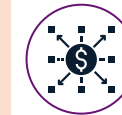

- Natural language interface to search pricing data, proposal information and data from upstream, down-stream applications
- Natural language scenario modeling capabilities

- Orchestration layer technology as well as Chat UI related architecture to be determined after discovery. Options include custom built MCP server, MS AI Foundry, Copilot studio or third party services

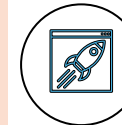

Value Delivered

Unified Experience

- Seamless access to internal / external knowledge
- Ease of use for users
- Customer Self Service

Faster Response Times

- Robust scalable foundation to easily onboard new clients

Operational Efficiency

- Empower employees to be assisted by AI Agents

Interactive Pricing Configurator

Visual, real-time pricing no spreadsheets, no guesswork

Key UX Capabilities

- ↔ Slider controls for margin floors, discount %, and geo multipliers
- 👤 Resource count per role with blended rate auto-calc
- 📅 Drag duration bars to adjust engagement timeline
- 💰 Live proposal price updates as each parameter changes
- 🛡️ Margin guardrails with visual alerts when floor is breached

Gen AI–Powered Proposal Builder

From configuration to client-ready document in minutes

Gen AI Capabilities

- ◆ Auto-draft executive summary from scope inputs
- ◆ Pull similar past proposals from KB with one click
- ◆ Rewrite sections by tone (formal, advisory, technical)
- ◆ Flag compliance and legal clause gaps
- ◆ Suggest upsell options based on client profile

Knowledge Base & Service Catalogue

- SOW** Pre-approved SOW clauses by service type
- Rate** Live rate cards by region, seniority, skill
- Catalog** Service catalogue with scoping templates
- Won** Searchable won/lost proposal archive
- Legal** T&C blocks, IP and liability clauses

Submission Intake & Endorsement Automation

1 The client faced challenges in product onboarding and pricing agility with New product onboarding required full-scale technology efforts

2 Lacked mechanisms to drive **digital adoption and dynamic pricing**

TARGETED OUTCOMES

Accelerate new product rollout through configurable rule-based systems

Reward digital adaption w/ differential pricing based on digital transactions

Integrated way to rollout and monitor offers / promotions across channels

SOLUTION ELEMENTS

PRODUCT CATALOG & PRICING PLATFORM (ZAFIN)

Zafin configured to meet the specific needs of the organization.

DATA INTEGRATION

Data sources reside in separate systems that integrate with Zafin through APIs

DOCUMENT GENERATION

Custom integration that allows for the generation of documents (e.g., invoices, price lists) based on product and pricing data.

ALTIMETRIK CAPABILITIES

DATA ENGINEERING & ANALYTICS

API & INTEGRATION ARCHITECTURE

AGILE PRODUCT ENGINEERING

DELIVERED RESULTS

Faster product rollout through configuration-driven approach

Better cross-channel consistency with centralized product data

Improved operational agility with integrated and scalable architecture

Cost Breakdown by Role

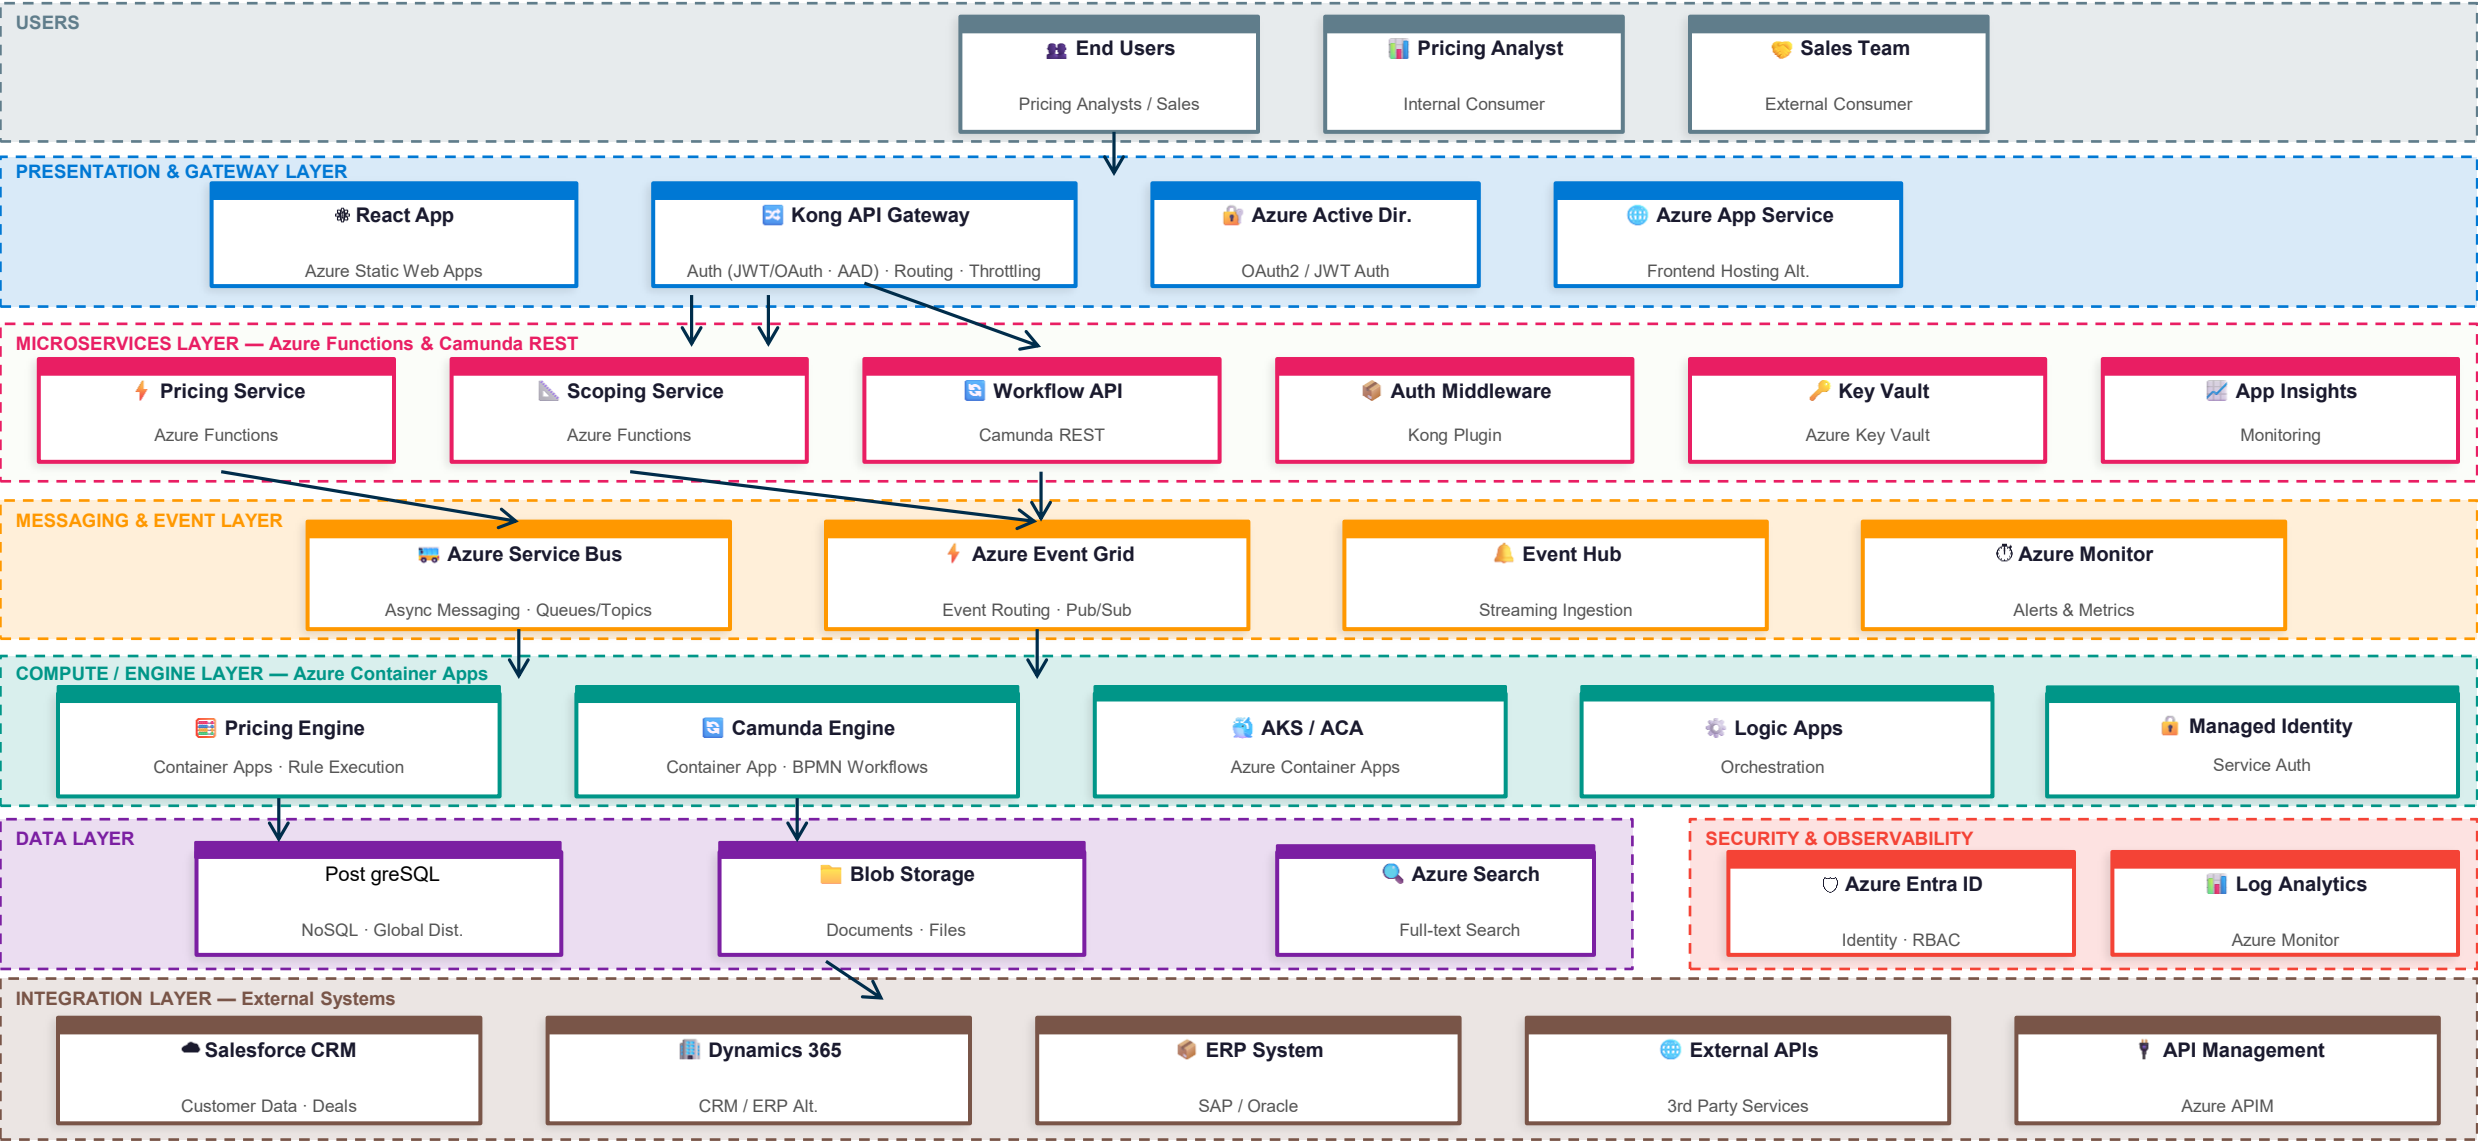

Staff	\$38,400	136 hrs
Senior Staff	\$44,800	80 hrs
Manager	\$36,000	50 hrs
Senior Manager	\$18,900	12 hrs
Partner	\$9,400	10 hrs

Key Architectural Components & Recommended Services

Architecture Layer	Recommended Service	Why
Web / UI	Azure App Service	Best fit for React, simple global hosting, CI/CD integration
API management	Kong on AKS	Policy enforcement, API governance , dev portal options
Microservices	Azure Container Apps	Serverless containers , Java support, KEDA autoscaling
Workflow	Camunda 8 Self-Managed on AKS	Best fit for Camunda on Azure with enterprise control
Event backbone	Azure Event Hubs (Kafka endpoint)	Managed Kafka-compatible event streaming
Transaction DB	Azure Database for PostgreSQL Flexible Server	Managed Postgres for transactional domain data
File/object store	Azure Blob Storage	Workbook/file storage and generated outputs
Secrets	Azure Key Vault	Centralized secret/cert/key management
AuthN/AuthZ	Microsoft Entra ID or Azure AD	Workforce identity, SSO, RBAC integration
Telemetry	Azure Monitor + App Insights	End-to-end observability and tracing

Azure Technical Architecture - Pricing & Workflow Platform

- LEGEND**
- Presentation / Gateway
 - Microservices (Azure Functions)
 - Messaging & Events
 - Compute Engines (Container Apps)
 - Data Layer
 - Integration (CRM / ERP)

Tech Stack and Architecture

Layer	Technology	Version	Purpose
Framework	React	19	Component-based UI
Build Tool	Vite	8.x	Fast HMR, optimized builds
Language	TypeScript	—	Type safety
Styling	Tailwind CSS	4.x	Utility-first CSS
Routing	Wouter	3.9	Lightweight client-side routing
Server State	TanStack React Query	5.x	Data fetching, caching, mutation
UI Primitives	Radix UI	Various	Accessible, unstyled components
Icons	Lucide React	1.8	Consistent icon system
Animation	Framer Motion	12.x	Smooth UI transitions
Charts	Recharts	3.8	Data visualization
Date Handling	date-fns	4.x	Date formatting and manipulation
